Acc. No. 7[illegible]
Am. Jour. 19

San Francisco Cal.
Apr 24, 1878.

Dr. Engelmann:

Dear Sir, —

Dr. Gray says, asks you to send me your paper on the Firs and Pines. Reason: — I expect to spend next June in the region north west of Mt. Shasta where the Pacific Coast Range becomes welded to the Sierra Nevada. Possibly some of the conifers may just show new forms there and in order that I may be able to work to the best advantage I must learn as much as possible of what is already settled.

PAPERS
GEORGE ENGELMANN

If you will indicate how I can be of use to you I shall gladly follow yours instructions as far as possible. I have not studied our birds, except in a general way, and am quite ig= norant of the great firs.

Respectfully

L. Rattan

Jan. 20, 1883.

Dr. Geo. Engelmann;

Dear Sir

I am sorry that I have no specimen of Rosa spithamea. When I collected it I suspected that it was a var. of R. Californica and secured only the specimens sent to Gray. Since then I have not revisited its habitat. This year I hope to go there via the crest of the coast range from Lake Co. to Scott Mountains. Starting from here the first of June I may be able in thirty days to do this.

Respectfully.

T. Kellan.
